

CHRIS MARTINDALE

VIBE CODER & TECH BUILDER

RAPID BUILDER. PROBLEM SOLVER. SYSTEMS THINKER. TEAM LEADER.

-  Based in San Angelo, TX
-  Available for Remote Opportunities
-  Open to Full-Time / Contract / Project
-  (682) 970-0207
-  chrismtx83@gmail.com

I BUILD. I SOLVE. I SHIP.

I'm a self-directed developer and builder who uses AI-powered workflows to rapidly turn ideas into **real, functional tools**. I combine modern AI development practices with a strong foundation in **traditional programming** to deliver clean, reliable solutions—fast.

I have a solid understanding of the full web development stack, including **HTML, CSS, JavaScript, TypeScript, React, Node.js**, and more. Whether I'm prompting an AI to scaffold, or diving in to hand-code and customize, I know how to get things done and make them work exactly right.

Beyond web, I have hands-on experience with **Unity** and **game development**, including C# scripting, game mechanics, UI systems, and optimization. This background strengthens my ability to think in systems, solve complex problems, and build interactive, engaging experiences.

I'm comfortable working across the entire lifecycle—planning, building, debugging, iterating, and refining—until the job is done and the solution delivers real value.

LEADERSHIP & OWNERSHIP

I bring **strong leadership skills**, with a track record of taking initiative, leading projects from concept to completion, and driving results. I communicate clearly, make decisions, and keep teams aligned and motivated to achieve goals. I take **full ownership** and treat every project like it's my own.

TECHNICAL SKILLS & TOOLS

Languages

- HTML / CSS
- JavaScript / TypeScript
- Python
- C#
- SQL

Frameworks & Libraries

- React
- Node.js / Express
- Tailwind CSS
- Unity
- More as needed

AI & LLM Tools

- OpenAI API
- Ollama (Local LLMs)
- Prompt Engineering
- AI-Assisted Workflows

Tools & Platforms

- Git / GitHub
- VS Code
- REST APIs
- Postman
- More as needed

Deployment & DevOps

- Local Deployment
- Online Deployment
- Full-Stack Hosting
- Environment Config
- Database Integration

I can build, customize, and deploy applications locally and online—from prototype to production.

Comfortable working with both AI-assisted workflows and writing/modifying code by hand to get the job done right.

Experienced with Ollama for local LLM development, testing, and private AI-powered solutions.

TECHNICAL FOCUS

- AI-Assisted Software Development
- Rapid Prototyping & MVP Development
- Full-Stack Web Application Development
- Workflow Automation & Internal Tools
- React, Node.js & Modern Web Technologies
- Prompt Engineering & AI Tooling
- API Integration & Deployment Workflows
- Systems Troubleshooting & Technical Problem Solving
- Process Optimization & Systems Thinking

PROFESSIONAL SUMMARY

Self-directed technical builder with a background in operations, systems troubleshooting, and process improvement. Recently focused on developing AI-assisted web applications, internal tools, and workflow automation using modern web technologies and large language models. Built and deployed full-stack applications while rapidly learning new frameworks, APIs, and deployment workflows through hands-on development. Combines practical operational experience, strong problem-solving ability, and an ownership mindset with a fast-moving, iterative approach to building software.

FEATURED TECHNICAL PROJECT

CiteDrop.com

- Designed and built CiteDrop, a web application for rapidly generating and sharing citation-backed information pages during online discussions, debates, and research conversations
- Implemented AI-assisted workflows for generating organized summaries, collecting sources, structuring research links, and creating shareable content pages in minutes
- Developed full-stack application architecture including frontend UI, backend API workflows, database integration, and deployment pipeline
- Focused heavily on rapid iteration, clean UX, performance optimization, and highly shareable research-driven communication
- Deployed and maintained the application publicly while continuously refining features, workflows, and user experience through iterative development

TECHNICAL STACK

React | Node.js | Express | Javascript | HTML/CSS | Tailwind CSS | GitHub | OpenAI API | Prompt Engineering | Rest APIs | VS Code

- Rapid Technical Learning & Adaptability

PROFESSIONAL EXPERIENCE

Commercial Floor Installer

Carlile Flooring — Traveling Role
2021 – 2025

- Installed **luxury vinyl tile (LVT)** in commercial environments across multiple states
- Performed **demolition of existing flooring**, including carpet removal and surface preparation
- Executed **concrete floor prep**, ensuring proper conditions for installation
- Worked in physically demanding environments requiring **lifting, bending, and long hours**
- Maintained high productivity and quality under tight project timelines
- Followed strict safety procedures and job site protocols
- Collaborated with team members to complete projects efficiently and on schedule

Note: This role is seasonal and so I drove for Uber and Spark during down months, as well as worked on my tech skills

Process Lead (Continuous Improvement)

Golden State Foods — Burleson, TX
2020 – 2021

- Improved production efficiency from **35% to 70% across 14 machines**, demonstrating strong operational awareness
 - Reduced downtime by identifying inefficiencies and improving workflow processes
 - Supported team operations in a fast-paced production environment
 - Assisted in material flow coordination and production organization
 - Contributed to maintaining structured and efficient work environments
-

Machine Operator

Golden State Foods — Burleson, TX

2019 – 2020

- Operated production equipment while maintaining consistent output and quality standards
- Assisted with **material handling, movement, and staging of products**
- Maintained clean and organized work areas to support safety and efficiency
- Followed safety procedures and operational guidelines in a high-volume environment

Master Sign Electrician

Legacy Signs of Texas — Fort Worth, TX

2016 – 2017

- Installed, serviced, and maintained electrical signage systems in commercial environments
- Diagnosed and resolved high- and low-voltage electrical issues in the field
- Interpreted blueprints, schematics, and job specifications to ensure accurate installations
- Performed troubleshooting and repairs to restore system functionality quickly and safely
- Ensured all work met electrical codes, safety standards, and project requirements
- Worked independently on service calls while maintaining clear communication with clients

Journeyman Sign Electrician / Graphic Artist / Sign Manufacturing

Southern Signs — Granbury, TX

2015 – 2016

- Installed and wired commercial signage systems, including transformers and electrical components
- Performed repairs, maintenance, and system upgrades on existing installations
- Assisted in fabrication and assembly of signage products
- Collaborated with team members to complete projects efficiently and on schedule

- Maintained high-quality workmanship while meeting tight deadlines
-

Sign Apprentice / Graphic Artist / Sign Manufacturing

Advance Signs — Joshua, TX

2009 – 2015

- Built foundational expertise in electrical installation, fabrication, and system assembly
- Assisted in wiring, mounting, and installation of signage systems
- Supported troubleshooting and repair tasks under supervision, progressing to independent work
- Contributed to design and production processes through graphic and fabrication support
- Developed strong understanding of electrical systems, tools, and safety procedures

Education

- GED
- Some College Coursework
- Master Sign Electrician License

Additional Information

- Valid Texas Driver's License (Clean record)
- Able to pass background check and drug screening
- Willing to travel locally for service calls
- Strong customer-facing communication skills
